

## Asia week ahead: Key economic data for China next week

China releases a raft of data next week and the main focus will be on second quarter GDP figures. Elsewhere, we'll also see unemployment data from Australia and June's CPI inflation for Japan

### China to release second quarter GDP figures

The highlight of the main data dump for June will be the second quarter GDP print. In our view, GDP will come in at the lower end of the 5.8%-8.0% year-on-year range. Industrial production is likely to weaken further from the 3.5% growth rate shown in May and retail sales – which had benefitted from both base effects and re-opening pent-up demand – will fall from a 12.7% rate to about 3%. The drag from construction, which is contracting at more than a 7% YoY rate, should continue. There will also probably be little sign of any boost from fixed asset investment or infrastructure spending. Trade figures already released which round out the second quarter indicate that net exports won't be playing much of a role in second quarter GDP either. The third quarter has all the potential to be even softer.

1Y and 5Y loan prime rates due at the end of the month will not likely change (currently at 3.55% and 4.20% respectively), although we would expect these to come down over the coming months after further reductions in PBoC policy rates.

## Australia's unemployment rate unlikely to go lower

The June labour market report follows an unexpectedly strong report for May (+75.9K), and we think there may be some statistical pullback from that figure. It is not clear that this will have any meaningful impact on the unemployment rate, which at 3.6% is still close to the all-time low rate of 3.4% reached last October. We are tempted to run with a small contraction in the total employment figure, driven by a correction in the full-time employment numbers and limited offset from a smaller positive figure for part-time workers. However, given the volatility of this release, we assign a low conviction to these forecasts.

## Japan CPI inflation to rise modestly

The Japanese government has issued a heat stroke warning for Tokyo and surrounding areas as outdoor temperatures rise sharply. Tokyo's Hachioji has hit the record for this year at 39.1C. With more people staying indoors, the increasing cooling demand has resulted in a rapid increase in the spot power rate, which is likely to cause the consumer price to rise modestly in June.

## Indonesia trade surplus to recover

May was a bit of an anomaly, with a spike in energy imports resulting in a stark narrowing of the trade surplus. The surplus slipped to a mere \$400 million, down from the average of \$4bn for the year. We expect imports to contract by 12.4% YoY as energy imports translate to a widening of the trade surplus to roughly \$3bn, even after exports slip by 18% YoY. A wider trade surplus should help shore up the IDR, which has come under some pressure recently.

## Key events in Asia next week

Country	Time (GMT+8)	Data/event	ING	Survey	Prev.
<b>Monday 17 July</b>					
China	0300	Jun Industrial Output (YoY%)	-		3.5
	0300	Jun Retail Sales (YoY%)	-		12.7
	0300	Q2 GDP (YoY%)	5		4.5
	0300	Q2 GDP (QoQ%)	0		2.2
Indonesia	0500	Jun Trade Balance (Bln of \$)	2.99		0.44
	0500	Jun Exports Growth (YoY%)	18.2		0.96
	0500	Jun Imports Growth (YoY%)	12.4		14.35
<b>Thursday 20 July</b>					
Japan	0050	Jun Exports (YoY%)	-		0.6
	0050	Jun Imports (YoY%)	-		-9.8
	0050	Jun Trade Balance Total Yen	-		-1372.5
Australia	0230	Jun Unemployment Rate	3.6		3.6
China	0215	Jul Loan Prime Rate 1Y	3.55		3.55
	0215	Jul Loan Prime Rate 5Y	4.2		4.2
<b>Friday 21 July</b>					
Japan	0030	June CPI (YoY%)			3.2
