# Fed meeting: Three things to watch this week

Expect a rate hike, but what the Fed says on growth, inflation and its balance sheet plans are just as important for markets

### Contents

- Economic outlook: It's all 'transitory'!
- Core inflation - where is it?
- The Fed's balance sheet plans

## How markets could react to the Fed this week

	Rate hike?	Economic outlook	Fed funds policy path	Balance sheet plans	Market Reaction			
					Short-term US rates	Long-term US rates	S&P 500	EUR/USD
Surprise Hold		Waiting for further confirmation that data weakness is transitory	No further 2017 hikes	No extra details Timing: 2018	-20 bp	-10 bp	+1.3%	1.1350
Dovish Hike		Expresses some caution about recent run of data	Split over 1 further 2017 hike	No extra details Timing: 2018	-5 bp	-5 bp	+0.5%	1.1300
<b>ING Base</b> Neutral Hike		Data weakness transitory, largely unchanged forecasts	1 further 2017 hike	Possible extra hints on finer details	+5 bp	+5 bp	Flat	1.1200
Hawkish Hike		Upbeat on recent run of data	2 further 2017 hikes	Plans formally announced for 2017 start	+20 bp	+15 bp	-1.0%	1.1100

## Economic outlook: It's all 'transitory'!

There's little doubt that much of the data since the March Fed meeting has been disappointing. No doubt this is partly attributable to poor seasonal adjustment, but this has left markets sceptical about the rates outlook for the rest of the year.

The Fed is at pains to point out that it is all 'transitory' – a buzz word that was used nine times in the latest minutes.

Expect see the 'T' word get plenty of airtime this week, and the Fed will point to some recent better news – most notably the dramatic fall in the unemployment rate since January.

We also anticipate a modest recovery in growth over the rest of the year, with or without Trump's stimulus package. That should be enough to see the Fed hike again in September.

## Core inflation - where is it?

Where the Fed's 'transitory' argument breaks down, at least at face value, is on inflation. Specifically, the Fed's favoured core PCE measure has failed to break out of the 1.5-1.8% range for some time. Wage growth has also been less aggressive in recent months.

This could easily change as the economy picks up speed again in the second quarter but, in the short term, this could be a communication headache for the Fed as their hiking ambitions diverge from their data-dependency guidance.

## The Fed's balance sheet plans

The Fed, keen to avoid taper tantrum 2.0, appears to be drip-feeding markets with its balance sheet plans to test the reaction.

---

**There's potential for further balance sheet clarity at this week's meeting**

---

We now know that the Fed will unwind its balance sheet using a cap on the value of bonds that

would be allowed to run-off each month. This cap will gradually increase every three months. But we are still awaiting details on the initial size of the cap, the likely size of cap adjustments and, crucially, the target equilibrium size of the balance sheet.

The other key element is timing. We are expecting the Fed formally to announce the start of this process at its December meeting, with reduction beginning in early 2018. The meeting minutes seem to be the favoured way of communicating these details, but there's potential for further clarity at this week's meeting.
