Next week looks set to be data heavy in EMEA and Latam alongside a few central bank minutes

### ✓ Czech GDP to confirm strong consumption and accelerating investment

Given the latest decline in the flash manufacturing PMIs in Eurozone and Germany and the somewhat weaker confidence in the Czech industry in May, Czech PMI will most likely finish below the 57 mark.

The second GDP estimate might bring a slightly higher print compared to the flash estimate of 4.5%, as was the case in previous quarters. Most importantly it should confirm strong household consumption and accelerating investments.
