Malaysia: Inflation misses estimates, again

Based on strong growth and benign inflation trends, we still look for Malaysia's central bank, Bank Negara Malaysia, to raise rates later this year

Contents

- Food, housing, transport drag inflation lower
- Tight labour market has no impact on inflation
- Policy mix remains positive for Malaysian ringgit

1.4%

Year-on-year

Lower than expected

Food, housing, transport drag inflation lower

Malaysia's consumer price inflation slowed more than expected to 1.4% year-on-year in February from 2.7% in January (consensus 1.9%, ING forecast 1.7%). It's no surprise that the food and transport CPI components continued to slow, thanks to the favourable base effects in both. Lower housing prices also helped despite seasonal quarterly hikes in rentals in the last month. Core inflation, which strips out food and fuel-related components from the total CPI, also slowed to 1.8% in February from 2.2% in January.

Among other inflation drivers, steadily falling inflation of import prices reflects the impact of continuing strength of the Malaysian ringgit (MYR) whereas the impact of rapid growth in domestic wages on consumer prices continues to be muted.

Strong currency, low imported inflation

Tight labour market has no impact on inflation

The tight labour market with wage growth outpacing productivity growth since September could be potentially inflationary. Or, it may not be. 2017 was the first year in almost a decade in which annual average wage growth slowed below productivity growth and yet inflation accelerated (see chart). History teaches us that the supply-side push to prices, especially in food and fuel sectors, is more dominant than demand-side pressures in driving Malaysia's inflation. Without any such supply shocks from food or oil prices, inflation will not be a concern throughout 2018.

Productivity, wages and inflation

Policy mix remains positive for Malaysian ringgit

Based on strong growth and benign inflation trends, we still look for Malaysia's central bank, Bank Negara Malaysia, to raise rates later this year, once the elections are out of the way. The macro policy mix of tightening monetary and loose fiscal policy is favourable for the Malaysian ringgit (MYR) to sustain its position among Asia's outperformers this year. The MYR's 3.3% year-to-date appreciation against the US Dollar is the second-best among Asian currencies. Our end-2018 USD/MYR forecast is 3.72 (spot 3.92, consensus 3.83).
