ENERGY SUSTAINABILITY UNITED STATES

Watch: Climate change becomes a ‘code red for humanity’

Amid a growing list of global challenges to reaching a net zero economy and an increasing need for urgent action on all sides, the optimal path for achieving key climate goals remains unclear. Our ESG specialist Coco Zhang also says concerns over energy security now present yet another layer of added uncertainty to the mix

- find a suitable pathway
- set interim targets
- report progress
- invest early

Climate change: A code red for humanity

The IPCC has made it clear that climate change now presents a ‘code red for humanity’ and that action is needed from all parts of the global economy to drastically reduce emissions – but what are the next steps? From the speed of technological advancement to mounting concerns over energy security, key uncertainties are making it difficult to determine the best course of action.
