

Watch: Our top calls for the future of scaling up hydrogen

As momentum builds in the race to reduce carbon emissions on a global scale, hydrogen is set to be a key player in the ongoing battle against climate change. It's still in its infancy, however, and we think there could be a few key roadblocks holding progress back along the way

Our top calls for the future of scaling up hydrogen

We expect the [hydrogen market](#) to grow in 2024, but less so than many have hoped for. The year ahead is also set to deliver policies for future growth. The actual number and size of new projects are less important, and attention should now shift to turning them into success stories so that confidence in hydrogen is able to flourish, says ING's Gerben Hieminga
