

Watch: The path to boosting renewables in the US power sector

In the US, federal and state policies have become crucial in increasing [renewable energy use in the power sector](#). Corporate purchases are now also key for speeding up the shift. In this video, our ESG Research specialist Coco Zhang delves into the details

The path to boosting renewables in the US power sector

As part of its climate ambition, the Biden administration now aims to transition the US to 100% clean electricity generation by 2035, which will require a huge increase in renewable energy use. But progress is being hindered by challenges with transmission lines, extreme weather events, supply chains and batteries - so what's next?
