Webinar: 50% copper tariff - rewiring trade, industry, and investment

Join us on 30 July for a live webinar exploring how the US's 50% copper tariff could transform trade flows, industry performance, and the wider economy. Sign up here

The US is set to impose a 50% tariff on copper imports starting 1 August - a move that has already sent shockwaves through global metals markets. As copper is a critical input for construction, electronics, and clean energy, the implications for inflation, trade flows, and industrial strategy are profound.

Join us for a live webinar, which comes just two days before the tariffs are set to come into effect, for a discussion with Ewa Manthey and James Knightley as we explore:

- How the tariff will reshape global copper trade and pricing
- Whether tariff will drive investment in new US mining projects
- The inflationary spillovers and risks to US growth

Details

Date: Wednesday 30 July

Time: 2:30pm BST/ 3:30pm CEST/ 9.30 am EST

The webinar will last 30 minutes, including a Q&A session at the end.

The event will take place online and a joining link will be emailed following registration. The waiting room will open 60 minutes ahead of the scheduled start time and you'll receive a reminder email 10 minutes before. Sign up here
